

AS 1200 with A 50

AS 1200 Testimonial – Garden keeping / roses, box trees, high fruit trees

User:

Trösch Gartenbau AG, Horgen

Horticulture technician Mirco Trösch

The penetration (especially at box trees) as well as the wetting are very good. This and the defined droplet size are reducing the spray liquid consumption up to 50%.

Application details	
Device:	AS 1200 with A 50
Nozzle:	AITXA 8003 VK (blue)
Airspeed level:	1 – 2 (roses), 3 – 4 (trees)
Pressure A 50:	10 bar
Spray liquid:	Biological spray liquid against box tree moth and fungi (roses, winter spraying)
Area:	Individually
Spray liquid consumption:	Up to 300 liters

Result / conclusion of Mirco Trösch:

- The AS 1200 is used for several applications in garden keeping.
- The airstream and the defined droplet size are perfect for an optimal penetration of the box trees.
- The spray liquid consumption can be reduced up to 50% (box tree).
